SKILLS SUMMARY

- Languages: Python
- Frameworks: Flask
- Tools & Platforms: Power BI, MySQL

PROJECTS

- **Hotel Management System (Python, GUI)** – Designed a desktop-based application to manage room booking and allocation, improving workflow efficiency.
- **N-Queen Visualizer (Flask)** – Built a web-based visualization tool for real-time algorithm execution and result analysis using DSA concepts.
- **Hostel Management System (DBMS, MySQL)** – Developed a database-backed system to store student records and handle online hostel bookings.
- **Parking Management System (Python)** – Implemented a system to manage parking slots, track time usage, and generate entry passes.

ACHIEVEMENTS

- Master Gold Badge – Coding Ninjas (2024)
- 2-Star Rating – CodeChef (2024)

CERTIFICATIONS

- Cloud Virtualization, Containers & APIs – Coursera
- Application Development using Microservices and Serverless – Coursera
- Spring Cloud Overview – Coursera
- IBM Cloud Essentials – IBM
- Data Structures and Algorithms – GeeksforGeeks
- Java Desktop Application
- Introduction to Artificial Intelligence – Coursera
- Computer Organization and Architecture – Udemy
- SQL for Data Science – Great Learning Academy

EDUCATION

- **Bachelor of Technology – Computer Science & Engineering**, Thappad University, CGPA: 7.6 (Since Aug 2021)
- Intermediate, Trinity Institute of Technology, CGPA: 7.9 (2018 – 2020)
- Matriculation, Church School, CGPA: 9.8 (2017 – 2018)
